SVEA

May 2011

SVEA addresses the use of web 2.0 skills by teachers and trainers in both vocational and adult education and training institutions.

Launch online platform offering custom web 2.0 tools for trainers and teachers

In order to foster the use of web 2.0 tools for organisational and personnel development in vocational and adult education and training, the SVEA consortium developed a platform which aims to bring together, in a single environment, the benefits offered by different web 2.0 tools and social platforms.

Built using Open Atrium, the SVEA platform has been designed to be easy-to-use and intuitive. It is based on the open software Drupal and, as such, it is extensible and customizable.

The SVEA platform offers different functionalities, designed to support the learners in the overall management of their learning activities:
Wiki | Case Tracker | Blog | Calendar | Shoutbox | Private messaging system | Bookmarks | Documents repository | ...

Register and get a preview of the SVEA platform at **http://sveabeta.csp.it**

or check out one of the three regional platforms that are available:
* baden-wuerttemberg.svea.csp.it
* europace.svea.csp.it
* wales.svea.csp.it

**Download the SVEA platform at
http://www.svea-project.eu/4580.html**

Training modules

The SVEA consortium has also developed a range of training modules covering the use of popular web 2.0 and social networking application in VET and adult training. The modules are designed for online delivery and are suitable for distance learning or blended learning programmes of study, as well as for use as stand-alone learning opportunities.

Modules available on:

Online Learning
Facebook
Blogging
Document Sharing
Video Sharing
Social Bookmarking
Wikis
Web 2.0 Communications

..... *and more to come!*

Training workshops

In the next months, five regional training workshops and two international webinars will be organised. In May-June 2011, a first trial of the training modules in English will be carried out in the SVEA partner regions Baden-Württemberg (DE), and Flanders (BE). A second trial will take place in Piemonte (IT) and Extremadura (ES) in autumn 2011. By then, modules will also be translated into Italian, Spanish, German and Dutch.

Check http://www.svea-project.eu/4584.html for more information on the training modules and workshops.
